

Type Codes

6.3 MKE047

Short text column	1	2	3	4	5	6	7	8	9	0	1	2	3	4	5	6	7	8	9	0	1	2	3	4	5	6	7	8	9	0	1	2	3	4	5	6	7	8	9	0		
Example:	M	K	E	0	4	7	B	-	1	4	4	-	A	G	0	-	B	E	N	N																						
Product																																										
MKE= MKE																																										
Size																																										
047= 047																																										
Length																																										
Length= B																																										
Winding																																										
MKE047B= 144																																										
Encoder																																										
Optical encoder, Singleturn Hiperface with 128 inkrements (S1)= A																																										
Optical encoder, Multiturn absolute Hiperface with 128 inkrements (M1)= C																																										
Shaft																																										
Plain shaft (with shaft sealing ring)= G																																										
Shaft with key per DIN 6885-1 (with shaft sealing ring)= P																																										
Holding brake																																										
Without holding brake= 0																																										
Holding brake 2.2 Nm= 1																																										
Electrical connection ¹⁾																																										
Terminal box, A-side= A																																										
Terminal box, B-side= B																																										
Terminal box, left= L																																										
Terminal box, right= R																																										
Housing design ²⁾																																										
Per ATEX standard= E																																										
Per GOST-R standard= G																																										
Per UL standard= U																																										
Other design																																										
None= NN																																										

Picture 1

Picture 1

Note:

- 1) = Looking from front onto driven shaft (see picture 1)
- 2) = Housing designs "E" or "G" are only available with electrical connection "B"
